CPCM 40-60 / CPVSM 40-60

Solid, simple and smart: advanced reliability in compressed air

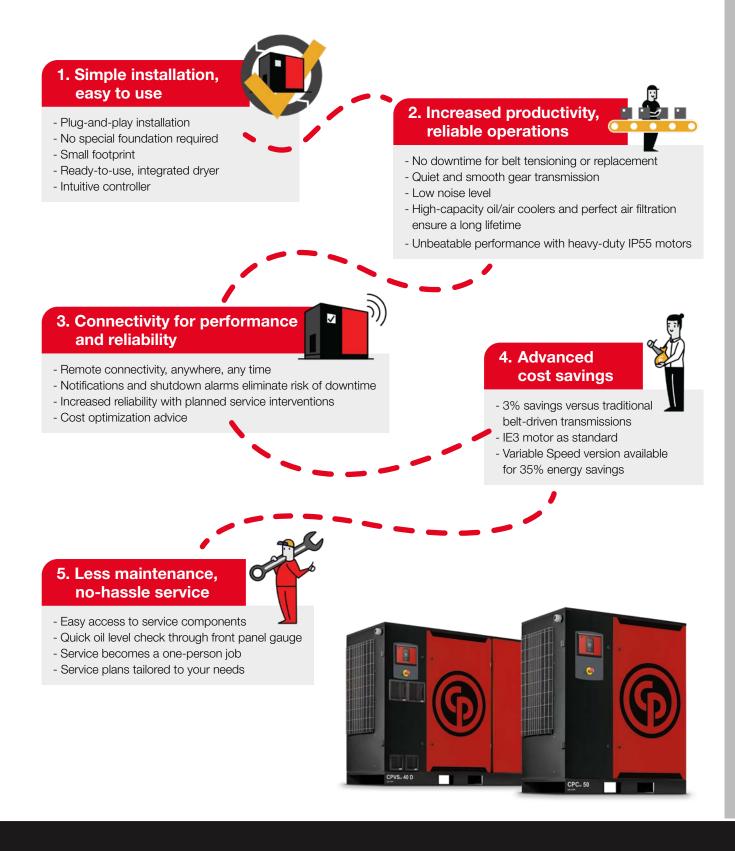

People. Passion. Performance.

CPCM 40-60 / CPVSM 40-60

Your production relies on compressed air, so you know the value of a compressor you can always count on. The CPCM was built to be your no-hassle, zero-frustration work floor companion. While typically compressors in this segment are belt-driven, our newest oil-injected rotary screw compressor comes with a direct gear transmission. That means no belts to tension, maintain and replace. The CPCM also features an advanced controller with integrated connectivity to easily manage and monitor your compressed air system. The result: reliability, ease-of-use and limited maintenance from the very first moment you commission your new CPCM.

CPCM 40-60 / CPVSM 40-60

More value for money

With the CPCM, we set out to build the better, more reliable compressor on the market. The compressor offers some major innovations that will you give a lifetime of value and savings.

A highly reliable gear transmission

A belt-driven compressor has a higher risk of downtime and maintenance-related costs. Unscheduled belt tensioning and replacement cause productivity losses and there is always the risk of post-service belt misalignment. That is why the CPCM comes with a gear drive transmission. You have no belts to replace and enjoy lower operating (service) costs. What is more, the CPCM is 3% more energy efficient compared to belt-driven compressors.

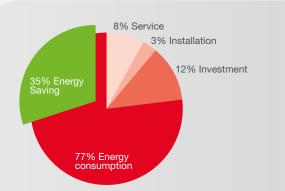

ES4000S controller for Optimal performance

The new CPCM comes standard equipped with an ES4000S controller that manages and monitors compressor performance. Easy to use, the ES4000S and the optional ES4000T with touch screen give you compressor updates and service alerts before they become a problem.

The integrated **CONS** connectivity gives you the advanced benefits of remote monitoring and management:

- Remote monitoring that helps you optimize your compressed air system and save energy.
- On-time maintenance to optimize costs and ensure a longer machine life.
- Potential problems are recognized before they can pose a threat to the continuity of your production.

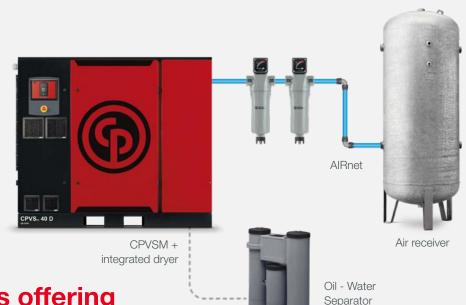

VSD: double digit energy savings

Is your work floor always running at 100%? A traditional compressor is, even when you don't need its full capacity. For most production environments, compressed air use fluctuates during the day or week.

That is why the CPCM offers optional variable speed drive technology. A CPCM with VSD matches its air delivery to your actual need. That means it is not using – and wasting – energy when your demand for compressed air is lower. Ask your Chicago Pneumatic representative to calculate how much you can save with a CPCM VSD. Typically, energy savings run in the double digits!

A total solutions offering from Chicago Pneumatic

Line Filters

Eliminate oil and dust from the compressed air to avoid the risk of contamination of your air system and final products.

Air Receiver

Buffer storage for your compressed air helps with condensate separation, pressure stabilization and efficient compressor operation.

Oil-Water Separator

Our oil-water separator captures compressor condensate and separates the oil for safe disposal.

AIRnet

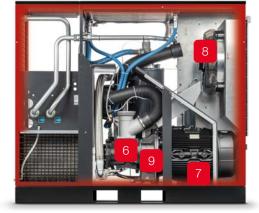

Our easy-to-install piping system distributes your compressed air with maximum efficiency and reliability.

Dryers

You need your compressed air to be dry and clean to protect your pneumatic tools and final products. Chicago Pneumatic offers a range of reliable, high-performance dryers to meet your air quality requirements and air system specifications.

- 1. Pre-filter
- 2. Oil separator
- 3. Electrical cubicle
- 4. Converter
- 5. Air filter
- 6. Air end 7. Motor
- 8. Fan motor
- 9. Gear box
- 10. Dryer
- 11. Oil-sight glass & oil-refill 12. Oil-filter

Optional features

Of course, one size does not fit all.

A range of options is available to tailor your CPCM to your specific requirements and production environment.

- Oil 8000h

- Canopy heater

- Food grade oil

- Coalescence filter option
 - Water separator drain + automatic drain
- Wooden package

- ES4000T controller
- Main isolator switch
- ECO6i central control

Chicago Pneumatic: full offer, global presence

Screw compressors

Piston compressors

Care. Trust. Efficiency.

Care.

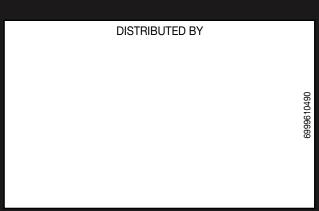

Care is what service is all about: professional service by knowledgeable people, using high-quality original parts.

Trust.

Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

Efficiency.

Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference.
